Full Description : (Specification
of co-operation request / offer)

A Slovak company is specialized in the manufacturing of mops, which use a unique way of wringing by using a mechanism of rollers. Right now it is produced in a small scale a therefore costs are high. Main customers are schools, organizations etc., where quality products with long life are required. The company is looking for a partner in the reciprocal production, who posses capacities to produce this cleaning equipment in a large scale. Therefore, preferably companies specialised in manufacture of plastic products with injection moulding machines are requested. The company would like to cooperate with a partner on the production process and it is ready to offer its expertise in technical aspects of production. The company owns utility model for the mentioned mops. Companies with injection moulding machines for plastics are sought. The partner should be a producer of cleaning equipment as well as should be able to incorporate this product into their production line.

Main advantages the company
could offer to a potential partner

The company has an expertise in producing the mops, based on its long-term experiences (15 years) in the production. The company uses high quality materials to produce its products.

Expected input of the partner

The company is expecting from the potential partner to have technical/production capacities preferably with injection moulding machines to produce cleaning equipment (mops and bucket with wringing mechanism) in a large scale and to incorporate this product into their production line. The company is also seeking partners preferably from Czech Republic and/or Poland due to the relative proximity of countries.
