What is Serbia Suppliers Database?

Serbia Investment and Export Promotion Agency utilizes the Serbia Suppliers Database as a key tool for providing its foreign clients with the updated and systematic information on Serbian suppliers, located in one spot. When it comes to exploring opportunities and industrial capacities in Serbia, this database is the most effective and efficient accessory. Whether it is products, semi finished goods, materials, tools, design, subcontractors or services, Serbia Suppliers Database offers a complete and accurate overview of the various Serbian industries.

Why use our database?

The Serbia Suppliers Database provides a thorough overview of Serbian industries, thus promoting Serbian products and services to the potential international buyers through SIEPA's website. Our simple yet effective application was developed by experts, in order to connect the right buyers with the right supplier. It is based on our experience in working with international purchase departments and Serbian companies.

Why import from Serbia?

Serbia is one of the main supply hubs for Europe, Asia and Africa. It has a long and rich industrial tradition in the fields of metalworking, plastic, rubber, food & beverages, automotive and construction, while in recent years ICT, embedded electronics, pharmaceutical, chemical and furniture sectors in Serbia are experiencing extensive growth.

Serbia features the most liberalized trade regulations in Europe. It is the only country outside of the Commonwealth of Independent States (CIS) that enjoys a free trade agreement with the Russian Federation, Belarus and Kazakhstan offering a customs-free access to its market of 170 million people. Moreover, quality goods from Serbia are exported duty-free to the European Union, Central European (CEFTA) countries, EFTA countries and Turkey.
